THE RETRIBUTION PROTOCOL

The Retribution Protocol

- Subtitle: A Data-Driven Global Thriller
- Concept: Polti's Situation #3 – Crime Pursued by Vengeance

THE CORE CONCEPT

- The Avenger vs. The Criminal
- Logline: After her brother is digitally "erased" and murdered by a tech billionaire, a cyber-investigator infiltrates his elite social network to dismantle his empire from within.
- Tone: High-stakes psychological cat-and-mouse (Mr. Robot meets Revenge).

KEEPING VIEWERS HOOKED

Maximizing Retention & Binge Velocity

- The Data: Strong positive correlation of 0.635 between weeks in the Top 10 (`netflix_weeks`) and viewing hours (`netflix_viewing_hours`).
- The Strategy:
 - "Target-of-the-Week" episodic structure (dismantling one accomplice at a time).
 - High-intensity cliffhangers to sustain a $10+$ week run in the Top 10.

LEAN AND HIGH IMPACT

- Multi-language production
- Characters from:
 - Seoul
 - Madrid
 - London
- Languages:
 - Korean
 - Spanish
 - English

Goal: Reach a broader international audience.

SUMMARY

Why It Wins

- Timeless Hook: Rooted in Polti's classic vengeance archetype.
- Data-Optimized: Built for Top 10 longevity, bilingual global appeal, and high-efficiency production.

WHAT IS HIT

```
netflix_viewing_hours > medium  
TMDB vote_average > average  
TMDB vote_count > average
```

A title was selected as a Hit if it met all three conditions

- have enough watching
- have high grade
- many people rank

WHY

The results show a significant positive influence of eWOM
volume and eWOM valence on the box office performance of
theatrical films.

Cramer, S., & Kunz, R. E. (2025). The role of electronic word-of-mouth as a quality signal for film consumption.
In M. J. von Rimscha (Ed.), Alles rational? Der menschliche Faktor in Medienorganisationen (pp. 91–105).
Deutsche Gesellschaft für Publizistik- und Kommunikationswissenschaft (DGPuK).

The_Role_of_Electronic_Word-of-Mouth.pdf?sequence=5](https://www.ssoar.info/ssoar/bitstream/handle/document/101890/ssoar-2025-cramer_et_al-The_Role_of_Electronic_Word-of-Mouth.pdf?sequence=5)

eWOM: means online talk, like reviews and comments on social media.

WHY

the explanatory power of the model for box office revenue and DVD sales mostly comes from the volume of eWOM, rather than valence, of eWOM.

Kim, K., Yoon, S., & Choi, Y. K. (2019). The effects of eWOM volume and valence on product sales – an empirical examination of the movie industry. *International Journal of Advertising*, 38(3), 471–488.

eWOM: means online talk, like reviews and comments on social media.

WHY

This report measures engagement by views (total hours viewed) and captures all viewing in the second half of 2025, representing 96B hours watched on Netflix.

Netflix. (2026, January 20). What we watched the second half of 2025.

NETFLIX_VIEWING_HOURS

show title	TMDB rating	TMDB votes	netflix_viewing_hours
Stranger Things	8.624	16,161	2874 million hours
The Seven Deadly Sins: Cursed by Light	8.462	4,710	7 million hours

PCA RANKING METHOD

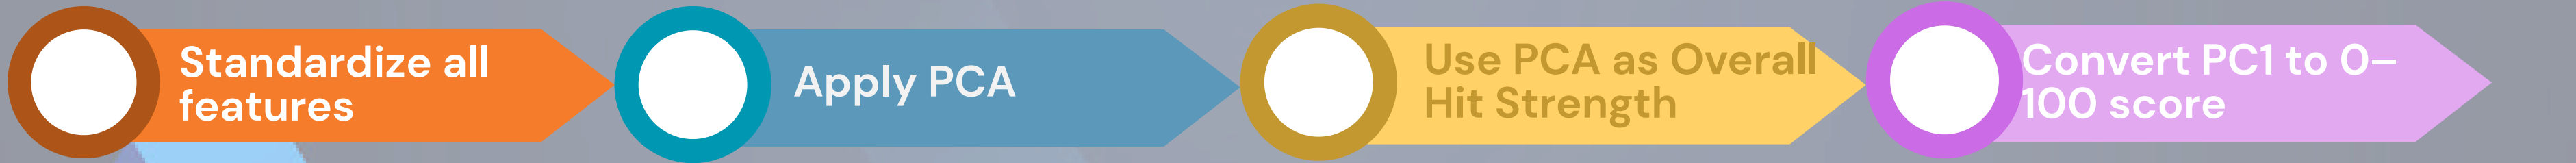

After identifying Hit titles, PCA was used to create a data-driven ranking score.

Feature	Meaning	*
Netflix viewing hours	Audience scale	np.log1p
TMDb rating	Audience reception	
TMDb vote count	Public engagement	np.log1p

```
count      6.910000e+02
mean       6.919165e+07
std        1.879555e+08
min        1.130000e+06
25%        8.930000e+06
50%        2.028000e+07
75%        5.560000e+07
max        2.874260e+09
Name: netflix_viewing_hours,
```

METHOD FLOW

PC1 captures the shared pattern among multiple success indicators, so it serves as an overall Hit-strength score.

```
graph LR; A(( )) --> B(( )) --> C(( )) --> D(( ))
```

Standardize all features

Apply PCA

Use PCA as Overall Hit Strength

Convert PC1 to 0–100 score

```
scaler = StandardScaler()

X_scaled = scaler.fit_transform(
    df_hit_rank[pca_features]
)
```

$$\text{PCA} = 0.695Z_{\text{votes}} + 0.534Z_{\text{viewing}} + 0.482Z_{\text{rating}}$$

```
pca = PCA()
principal_components = pca.fit_transform(X_scaled)
```

$$\text{Hit Score} = \frac{PC1 - \min(PC1)}{\max(PC1) - \min(PC1)} \times 100$$

RESULT

DATA * 32

	Hit Rank	Title	Hit Composite Score	Viewing Hours (Million)	TMDb Rating	TMDb Vote Count
0	1	Stranger Things	100.00	2874.26	8.624	16161.0
1	2	Money Heist	82.17	1170.20	8.257	17836.0
2	3	Squid Game	74.35	2289.50	7.831	13053.0
